

Project Garden Restoration 2008

Cleaning up an old garden and removing all the weeds whilst leaving the plants we wanted to keep, was the focus for the students from Room 1. After the big clean up we designed a recycled garden using plants and an old playground stage and edging to create a beautiful restful place to relax. (June 08)

Now we have what we set out to achieve. Lots of room for our recycled plants to grow, pathways to explore, a stage to dance on or just sit and wonder, a sculpture made of Hinuera stone carved by Mr Kerr (our awesome property manager) to demonstrate what we too can create. (October 2008)
